

Main.java

```
package hil;
public class Main {
    public static void main(String[] args) {
        Hilo1 Hil1 = new Hilo1("jose");
        Hil1.start();
        Hilo2 Hil2 = new Hilo2("juan");
        Hil2.start();
        Hilo3 Hil3 = new Hilo3("andres");
        Hil3.start();
        Hilo4 Hil4 = new Hilo4("andres");
        Hil4.start();
    }
}
```

Hilo1.java

```
package hil;
public class Hilo1 extends Thread{
    public Hilo1(String str)
    {
        super(str);
    }
    public void run()
    {
        for (int i=0; i<10; i++)
        {
            System.out.println(i+" "+getName());
        }
    }
}
```

Hilo2.java

```
package hil;
public class Hilo2 extends Thread{
    public Hilo2(String str)
    {
        super(str);
    }
    public void run()
    {
        for (int i=0; i<10; i++)
        {
```

```
        System.out.println(i+" "+getName());
    }
}

}
```

Hilo3.java

```
package hil;

public class Hilo3 extends Thread{
    public Hilo3(String str)
    {
        super(str);
    }
    public void run()
    {
        for (int i=0; i<10; i++)
        {
            System.out.println(i+" "+getName());
        }
    }
}

}
```

Hilo4.java

```
package hil;

public class Hilo4 extends Thread{
    public Hilo4(String str)
    {
        super(str);
    }
    public void run()
    {
        for (int i=0; i<10; i++)
        {
            System.out.println(i+" "+getName());
        }
    }
}

}
```
